

# Enabling Staff movement & Digital Staff Passports

**The Northern, Yorkshire and Humberside NHS Directors of Informatics Forum  
NYHDIF**

11<sup>th</sup> November 2021

Philip Graham, Digital Programme Director,  
Blackpool Teaching Hospitals NHS Foundation Trust

# Thank you for the invite

Blackpool Teaching Hospitals  
NHS Foundation Trust

## Lancashire to Yorkshire

## Paper to Digital

# Enabling staff movement – Agenda

1. Vision, Ambitions and User Needs
2. Digital Staff Passports
3. Future Direction
4. Workforce Systems

## **Vision, Ambition and User Needs**

# NHS Vision

## Enabling Staff Movement

Need to **enable rapid deployment** of our people across NHS organisations, through enabling the sharing of information such as HR records and statutory and mandatory training.

## Digital Staff Passport

Using technology to deploy staff, which simplifies staff movement between NHS organisations, saves time by providing a verified record of identity and employment, and allows colleagues to carry their credentials and professional registration on their smartphone.

## **Our ambition is...**

- All staff to have access to a digital staff passport
- All workforce systems to be interoperable
- All staff are able to easily and securely log into clinical/workforce systems
- All staff experience a more efficient and focused induction recognising previous training and experience

# Commitments to supporting staff when they move

## NHS Long Term Plan (Jan-19)

“enable staff to more easily move from one NHS employer to another”

## People Plan (Aug-19)

“Over the **next five years** we will support every NHS employer to streamline their induction and onboarding processes to reduce duplication and to recognise previous training and skills ‘**passported**’ from previous employers”.

## People Plan (Jul-20)

“Digital staff passport: Systems are supporting the trial of the Covid-19 digital staff passport during winter 2020, which simplifies the high volume of temporary staff movement between NHS organisations, saves time by providing a verified record of identity and employment and allows colleagues to carry their credentials and professional registration on their smartphone.”

## Busting Bureaucracy (Nov-20)

“NHSE/I, NHSX and HEE are working to provide multiple staff groups with access to digital staff passports in line with People Plan commitments to improve workforce agility and to support staff training and development.

Junior doctors, who frequently rotate to different healthcare providers, are being prioritised and the ambition is that they will have access to staff passports in 2021/22. The passports will hold digital credentials representing their skills, competencies and occupational health checks.”

# User Needs to Enable Staff Movements

NHS staff move around a lot and each time have to repeat form filling, employment checks, mandatory training etc. This leads to slow onboarding, high use of agency workers, frustration for staff and high levels of administration. For example:

- Staff being temporarily deployed to another NHS organisation (e.g. Covid 19)
- Staff working for one NHS Organisation moving to another (e.g. Doctors in training)
- Bank workers having to register with each NHS organisation or choose to sign up with one agency.

## People Plan

“Over the **next five years** we will support every NHS employer to streamline their induction and onboarding processes to reduce duplication and to recognise previous training and skills ‘**passported**’ from previous employers”

## NHS Long Term Plan

“we need to improve the experience of staff when they move between NHS organisations, **reducing the duplication of employment checks** and induction”

# High volumes of staff movements

| Type of Movement              | Description   | Volumes  |
|-------------------------------|---|--|
| <b>Internal Movements</b>     | Within a single employer<br>(no data transfer required)   | <ul style="list-style-type: none"> <li>• Estimated 300,000-600,000 per annum</li> </ul>  |
| <b>Permanent Movements</b>    | Employment contract moves from one employer to a new employer   | <ul style="list-style-type: none"> <li>• 400,000+ new starters per annum</li> <li>• 50,000+ Doctors in Training (DiT) movements</li> </ul> |
| <b>Temporary Movements</b>    | Employment contract remains with employing organisations<br>Movement is classed as seconded, redeployed, emergencies, honorary, voluntary | <ul style="list-style-type: none"> <li>• 100,000+ per annum</li> </ul>   |
| <b>Permanent to/from Bank</b> | Inhouse or outsourced bank – multiple employers and assignments   | <ul style="list-style-type: none"> <li>• 800,000+ registered bank workers</li> <li>• 300,000+ active bank workers</li> </ul>               |
| <b>Bank to Bank</b>           | Staff registering with multiple banks<br>Staff moving between collaborative banks   | <ul style="list-style-type: none"> <li>• 60,000+ on collaborative banks</li> </ul>   |
| <b>Substantive and Agency</b> | Substantive and bank workers also work via external agencies  | <ul style="list-style-type: none"> <li>• High percentage of agency workers are also substantive NHS employees</li> </ul>                   |

Increasing service pressures and changes to the way health and social care services are commissioned and delivered requires an increasingly flexible and adaptable approach to sharing resources between employing organisations. Never more so than during the Covid-19 pandemic.

# The experience of Doctors and Dentists in Training

53,000

Approx. Doctors and Dentists in Training

Employment checks

2 Estimated days spent per rotation on duplication

10

Moves during the course of their training

2 Moves per year between NHS organisations

Core Skills Training subjects

£22m

Estimated lost trainee time per annum

66

Medical specialisms

230+

Organisations

The Doctors in Training Case for Change and the design of a Target Experience for DiTs highlighted the **significant pain points** for **Doctors** and **Dentists** as they rotate employers as part of their training programmes

63%

Spend > 4 hours repeating employment checks

49%

Required to travel

64%

Repeat statutory and mandatory training

700+

FTE Wasted time

# Enabling Staff Movements

**Aim:** to improve the experience of staff when they move between roles in the NHS, reducing the duplication of form filing, employment checks and mandatory training, so that they can spend more time with patients

Strategic  
pillars

## Employment Models

Reducing changes in  
employment  
(e.g. Lead Employers)

## Interoperable OH & LMS Systems

Enabling data to flow  
between HR systems  
driving up data quality

## Digital Staff Passports

Enabling person-centric  
passporting across  
multiple issuers and  
verifiers

Adoption & Process Change

Core  
foundations

Trusted Frameworks

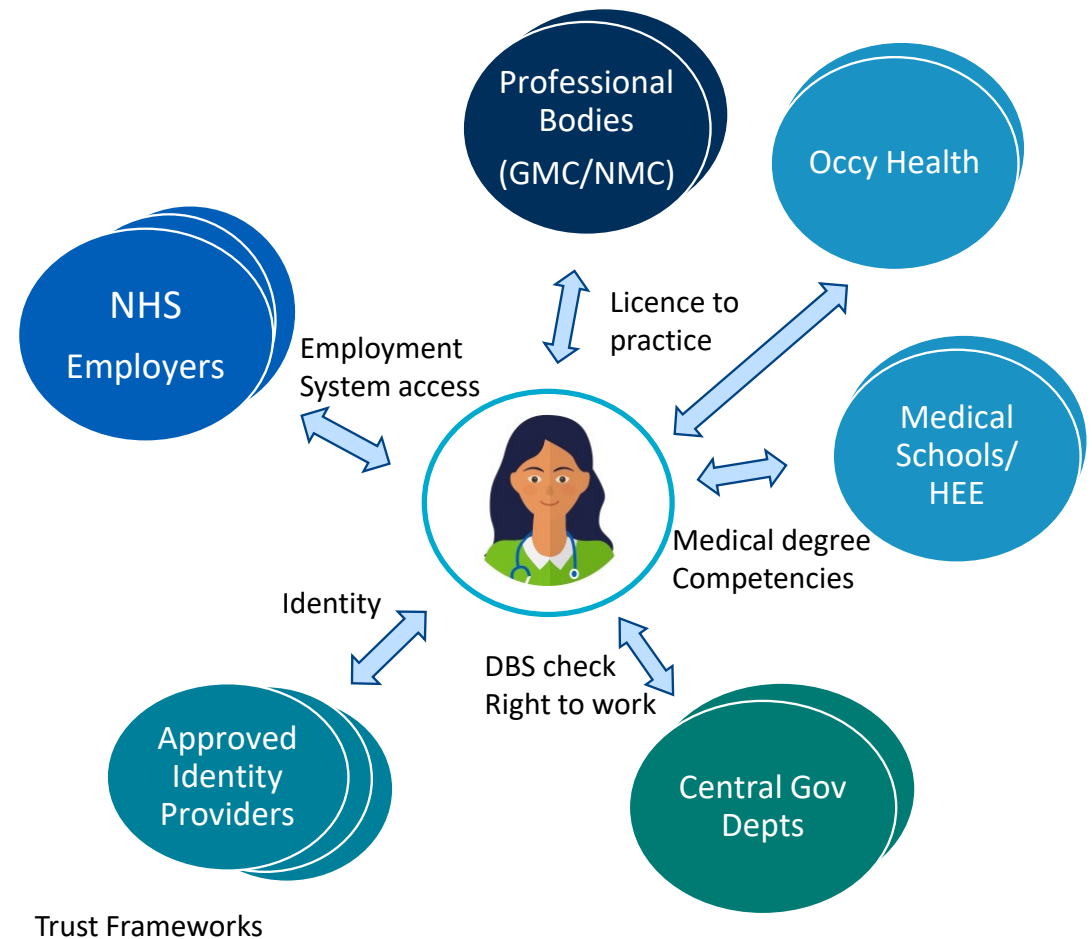

Data and Interoperability Standards

# Digital Staff Passports

# NHS staff and verifiable credentials

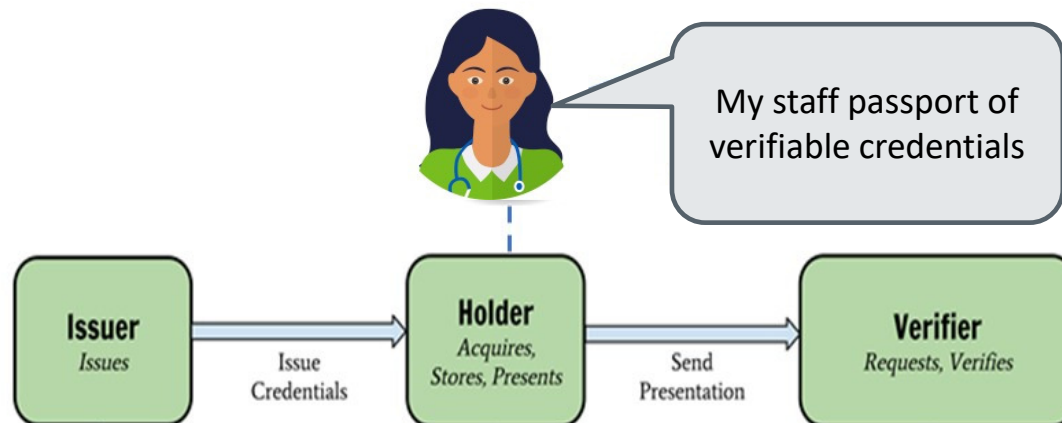

1. Staff have relationships with multiple actors that require the exchange of trustworthy data for operational and compliance purposes
2. Significant value can be realised by digitally enabling these relationships and enabling individuals to control data sharing

| Authoritative issuers of credentials | Credential types   |
|--------------------------------------|--|
| Approved identity provider           | Identity credential  |
| Medical School                       | Medical degree credential                                  |
| GMC                                  | Licence to practice credential                             |
| NHS Employers                        | Proof of Employment credential<br>System access credential |
| HEE                                  | Specialty / Competency credential                          |
| Occupational Health                  | Vaccination credential<br>OH check credential              |
| DBS                                  | DBS Advanced Adult & Child check cred                      |

# Standards based architecture for secure interoperability

- The [verifiable credential](#) standard (W3C) allows for the digital representation of physical credentials
- A doctor/citizen is a credential **Holder** who obtains credentials from trusted **Issuers**, representing anything from a verified identity to professional status and healthcare test results
- The Holder can securely maintain these credentials on a mobile phone and present them to any credential **Verifiers** they choose. The use of digital signatures makes [verifiable credentials](#) more tamper-proof

- Decentralized identifier (DID):  
A portable URL-based identifier associated with an [entity](#)
- 3 proof format ecosystems:  
JSON+JWTs, JSON-LD+JWTs, and JSON-LD+LD-Proofs
- SSO enablers include:  
high confidence authentication factors plus  
OIDC and signed JWTs

## **Digital Staff Passports – Covid**

An interim COVID-19 Digital Staff Passport is now in **beta testing** to enable safe staff movements between NHS organisations

Support the temporary movement of staff for COVID-19 response and the recovery of services.

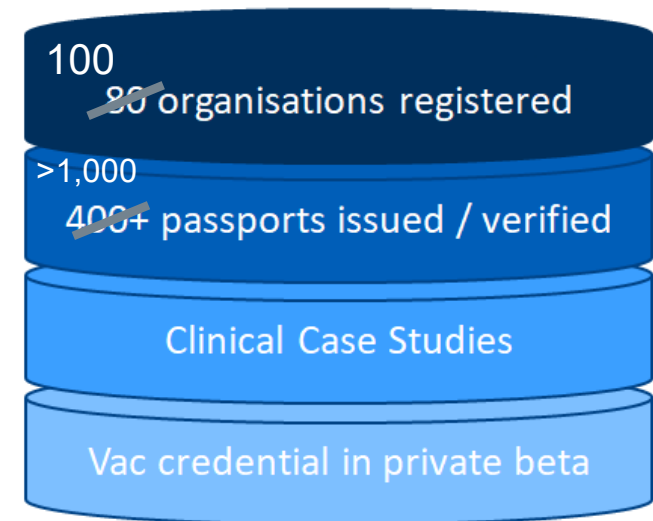

<https://beta.staffpassports.nhs.uk/>

# Covid-19 Digital Staff Passport

- Provides decentralised technology, for the first time, to enable staff members to digitally share specific data safely and securely between NHS Trusts. **Saving time and reducing administration burden with a heightened level of data security.**
- **Empowers the staff member** to be in control of their data, deciding to whom and when they share it to support their information for a temporary deployment.
- **Clinical Case Studies:**
  - Major Trauma network to enable surgeons to be deployed more efficiently, eliminating the need for honorary contracts or repeat employment checks. Blueprint now being used by other clinical networks
  - Temporary deployment of clinical staff to support mass vaccination sites and other clinical activity
  - National mobilisation of two cohorts of military personnel (316 passports issued) ready for rapid and secure deployment
- **Additional vaccination programme (VP) credential** completed first phase of private beta. *Supporting a fast, secure and data rich arrival check-in process for staff*

"The COVID-19 Digital Staff Passport has allowed for the Vaccination Quick Response Force (VQRF) to be deployed quickly and safely, to start supercharging areas where it is most needed"

**Major Shaun McGarry**

"It would help the flow. It's a really good idea. I like it."

"It's really straightforward and it gives us assurance."

# Digital Staff Passports – our experience to date

- ✓ **Puts staff in control** - Allows staff to hold their own digital identity, employment checks credentials and core skills training credentials (until they expire or are revoked).
- ✓ **Staff feel empowered** - Staff are involved in the process at every step to accept, reject and share their information and are keen to, particularly when it benefits them.
- ✓ **Transparency** – Staff know who has seen their information and for what purpose. Privacy and security are essential.
- ✓ **Trusted sources** – Focus becomes increasingly to establish single sources of truth for each key piece of information. This requires interoperability between these trusted data sources.
- ✓ **Verified data is valued** – If data helps to 'fasttrack' onboarding processes, it becomes highly valuable to both staff and employers. This requires 'trusted frameworks'.
- ✓ **Saves time** – Simplicity and intuitiveness is key to adoption of new processes, thereby releasing time of both staff and administration teams.
- ✓ **Removes duplication** – shared desire to reduce and eliminate unnecessary duplication, however, requires absolute 'trust' between organisations.
- ✓ **Speeds up recruitment and redeployment** – reducing delays, cost of agency backfill, helps rota management challenges and enables staff to be with patients more quickly.
- ✓ **Positive experience for staff involved to date and plenty of lessons learned.**

Enabling  
system  
collaboration

Empowering  
NHS orgs to  
respond to  
emergencies

Establishing  
'trust' between  
employers

spent and  
skills obtained  
by employees

# South Yorkshire and Bassetlaw Case Study FINAL PDF .pdf (staffpassports.nhs.uk)

COVID-19 Digital Staff Passport

## Case Study...

### Rapid staff movement across an ICS using the Interim NHS Digital Staff Passport

South Yorkshire and Bassetlaw Integrated Care System

The South Yorkshire and Bassetlaw Integrated Care System are fully utilising the Interim (COVID-19) NHS Digital Staff Passport to enable the rapid and safe temporary deployment of staff to deliver care at all the NHS provider organisations and vaccination hubs sites.

**'Using the passport has saved us weeks' of time!** says Kay Barker, Recruitment and Workforce Assistant Manager, Sheffield Teaching Hospitals NHS Foundation Trust.

#### Background

The South Yorkshire and Bassetlaw Integrated Care System (SYB ICS) formally launched as an ICS in October 2018 after three years working in partnership. It serves a population of 1.5 million, in five local places (Barnsley, Bassetlaw, Doncaster, Rotherham and Sheffield). The system includes 72,000 members of staff, 208 GP practices, 36 neighbourhoods, 6 Acute hospital and community trusts, 6 Local authorities, 5 Clinical Commissioning Groups and 4 care/ mental health trusts and 1 regional vaccination hub with 2 sites.

The partners in the ICS have committed to developing services and meeting a range of service performance standards including *'Deploying professionals to the right parts of the system to achieve the vision, service performance and transformation required'*, and see the COVID-19 Digital Staff Passport as one of the technological tools to help them achieve it.

Recruitment leads across SYB ICS have been working to implement the passport which is the next stage of the Memorandum of Understanding (MOU) that has been signed by the HR Directors (HRDs) within SYB. All Trusts that have signed up to use the passport are working to ensure they have processes in place to support its successful implementation and usage. It was essential that agreement was reached by all organisations to use the passport to enable easier movement of staff between NHS provider organisations and to support the regional vaccination hub and its 2 sites run by Sheffield Teaching Hospitals (STH).

Prior to using the passport, deploying staff was a time consuming and administratively heavy process, involving honorary contracts or letters of authority, and either obtaining employment checks from current employers or repeating checks unnecessarily. Implementing the COVID-19 Digital Staff Passport system has enabled rapid reduction in the time taken to deploy staff from 1-3 weeks to 1-2 days and has reduced the administrative burden by

Having a nationally developed and supported system that enables a system to safely deploy staff has really enable us to mobilise our workforce across the ICS, **it has saved significant time for our HR staff, has greatly improved the experience of our staff** and ultimately is enabling us to deliver the care to our patients' says Jill Quince, Recruitment and Workforce Manager for the SYB Vaccination Programme.

**'It's a great system for NHS-to-NHS staff movement**, the ease of use has made it an essential tool for us during the current pandemic" says Jordan Berry, Recruitment Coordinator at Sheffield Children's NHS Foundation Trust.

Using the passport enabled the organisations to significantly save administration time, by removing the need to request for or repeat employments checks and the generation of honorary contracts.

**"The passport enabled us to quickly transfer people** from different Trusts to our own to work within an urgent critical care function. This took away a large administrative burden and **allowed us to focus on helping to move the people across to deliver services to patients instead**" says Catriona Collins, Head of People Resourcing at Sheffield Children's NHS Foundation Trust.

# Future Direction – Roadmap

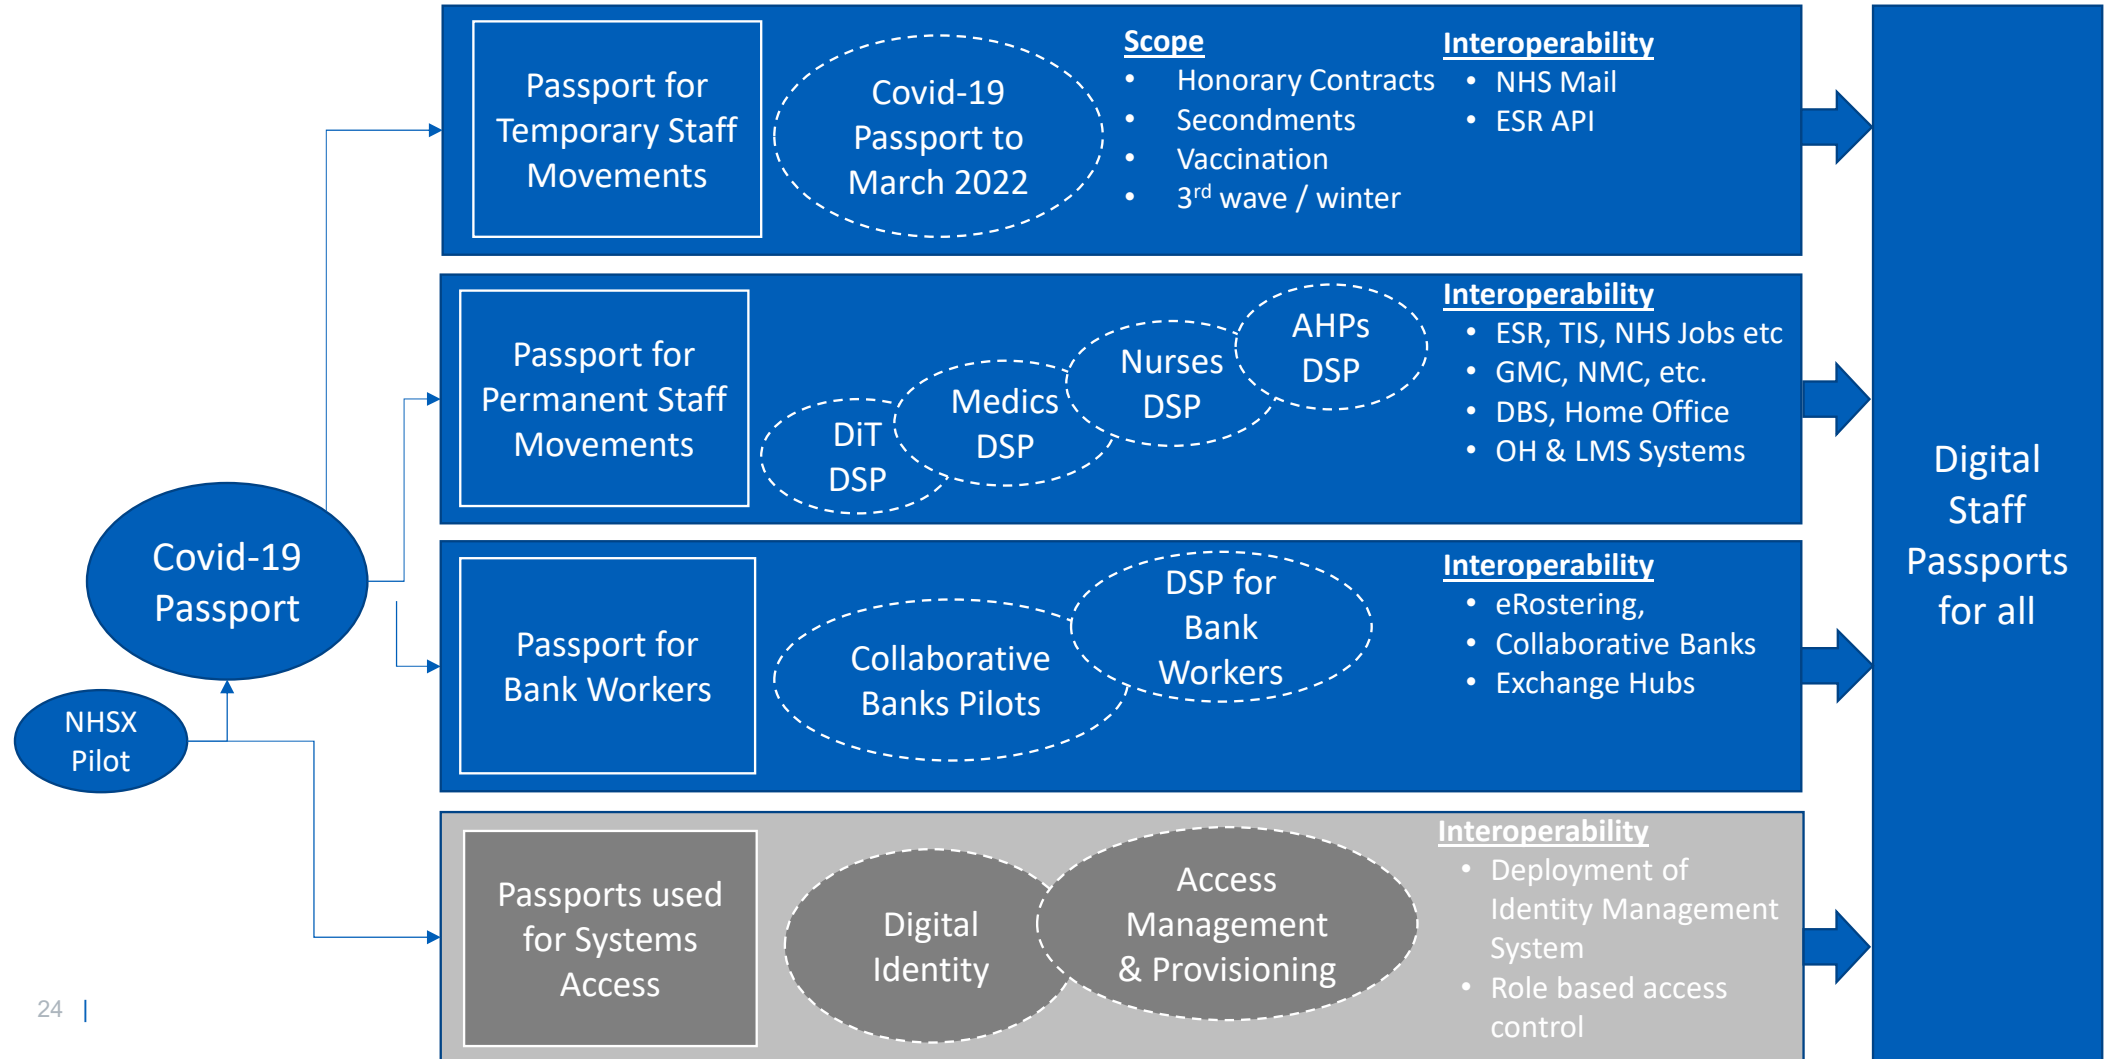

# Roadmap for Enabling Staff Movements

- ✓ Improving staff experience
- ✓ Speeding up onboarding
- ✓ Reducing duplication
- ✓ Reducing agency spend

# Roadmap for Digital Staff Passports

# Future Direction, Collaborative Banks

# Collaborative Bank Vision

Posting Vacancies

Vacancy posted to Collaborative Bank by Brenda at East Lancs

Applying for shifts

Jenny at Blackpool can apply to any vacancy in the collaborative bank

Onboarding

Brenda at East Lancs can view and recruit the applicant..

East Lancs requests credentials from passport wallet to complete rapid pre-employment checks, remotely and without paper

Systems Access

Brenda at East Lancs issues systems access credential to Jenny's passport.

Jenny can now use the passport to logon to systems at East Lancs

Shifts filled rapidly and safely

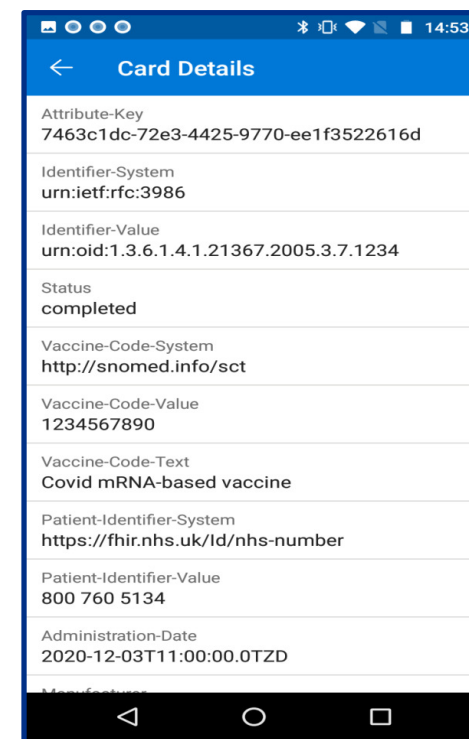

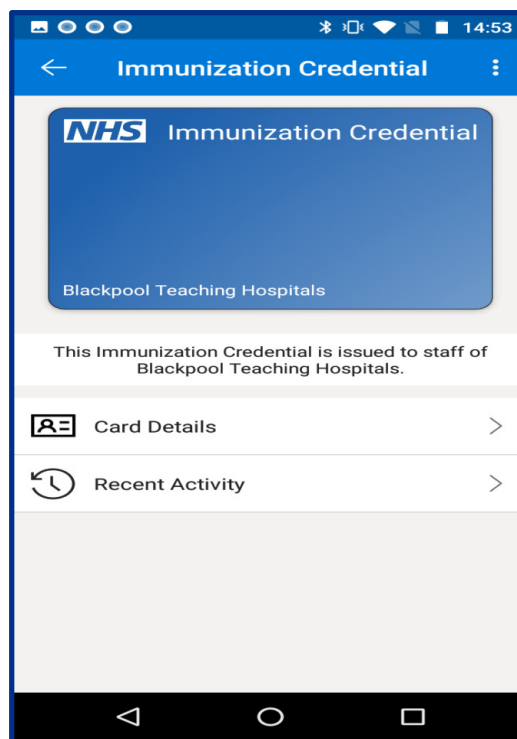

Patients at East Lancs benefit due to rapid filling of vacancies, better staff satisfaction

# Future Direction – Multiple Wallets

# Multiple Wallets

## EMPLOYEE ACCEPTS VACCINE CREDENTIAL INTO DIGITAL WALLET

# **Future Direction – provisioning, biometrics and systems access**

Pan-NHS authenticators & credentials:

PIN or Biometric binding + control of key (AAL 2/3)

Exchange of credentials  
MFA

Verifiable credentials such as:

- Assured Identity (IAL 2/3)
- Right to work
- DBS check
- Licence to practice
- Qualifications
- Employment assignment

Wallets can co-exist with other login devices

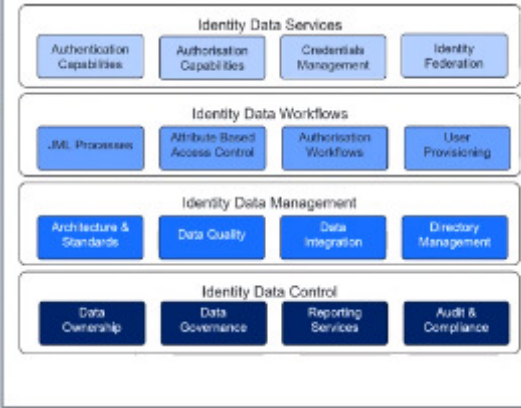

Smartcard

FIDO2 USB

## II.2.4) Description of the procurement

### II.1.4) Short descr

Digital St

NHS Eng  
movemer  
Covid-19 |  
verifiable  
Improven  
solution.

### II.2.14) Additional information

The first Invitations to Tender for this new service line will include the following:

designing and developing an alpha version of digital staff passports for permanent staff movements, starting with doctors in training

extending the use of the Covid Digital Staff Passport to enable staff movements during the Covid pandemic for temporary staff movements

providers under the Health System Support Framework to ensure a broad and open market is created.

## Opportunity for suppliers

- Become partners in the NHS ambition for digital staff passports
- Join the new 'digital passports' service line on HSSF
- Respond to upcoming invitations to tender
- Get involved in defining data and interoperability standards
- Participate in future hackathons, discovery work and alphas
- Become interoperable with other digital passport technology and workforce system providers

**The NHS is increasingly operating as integrated systems and is looking for technology suppliers to enable these new ways of working.**

# Interoperable Workforce Systems

# Interoperable Workforce IT Systems

**Problem:** NHS operates several national workforce systems, including ESR, NHS Jobs (both by NHS BSA), Oriel, TIS, eLearning for health (all HEE systems) and each NHS organisation has several workflow systems. These systems do not all interoperate, leading to repeated manual entry of data, data quality issues, limited visibility of workforce information and anti-competitive behaviour by some providers.

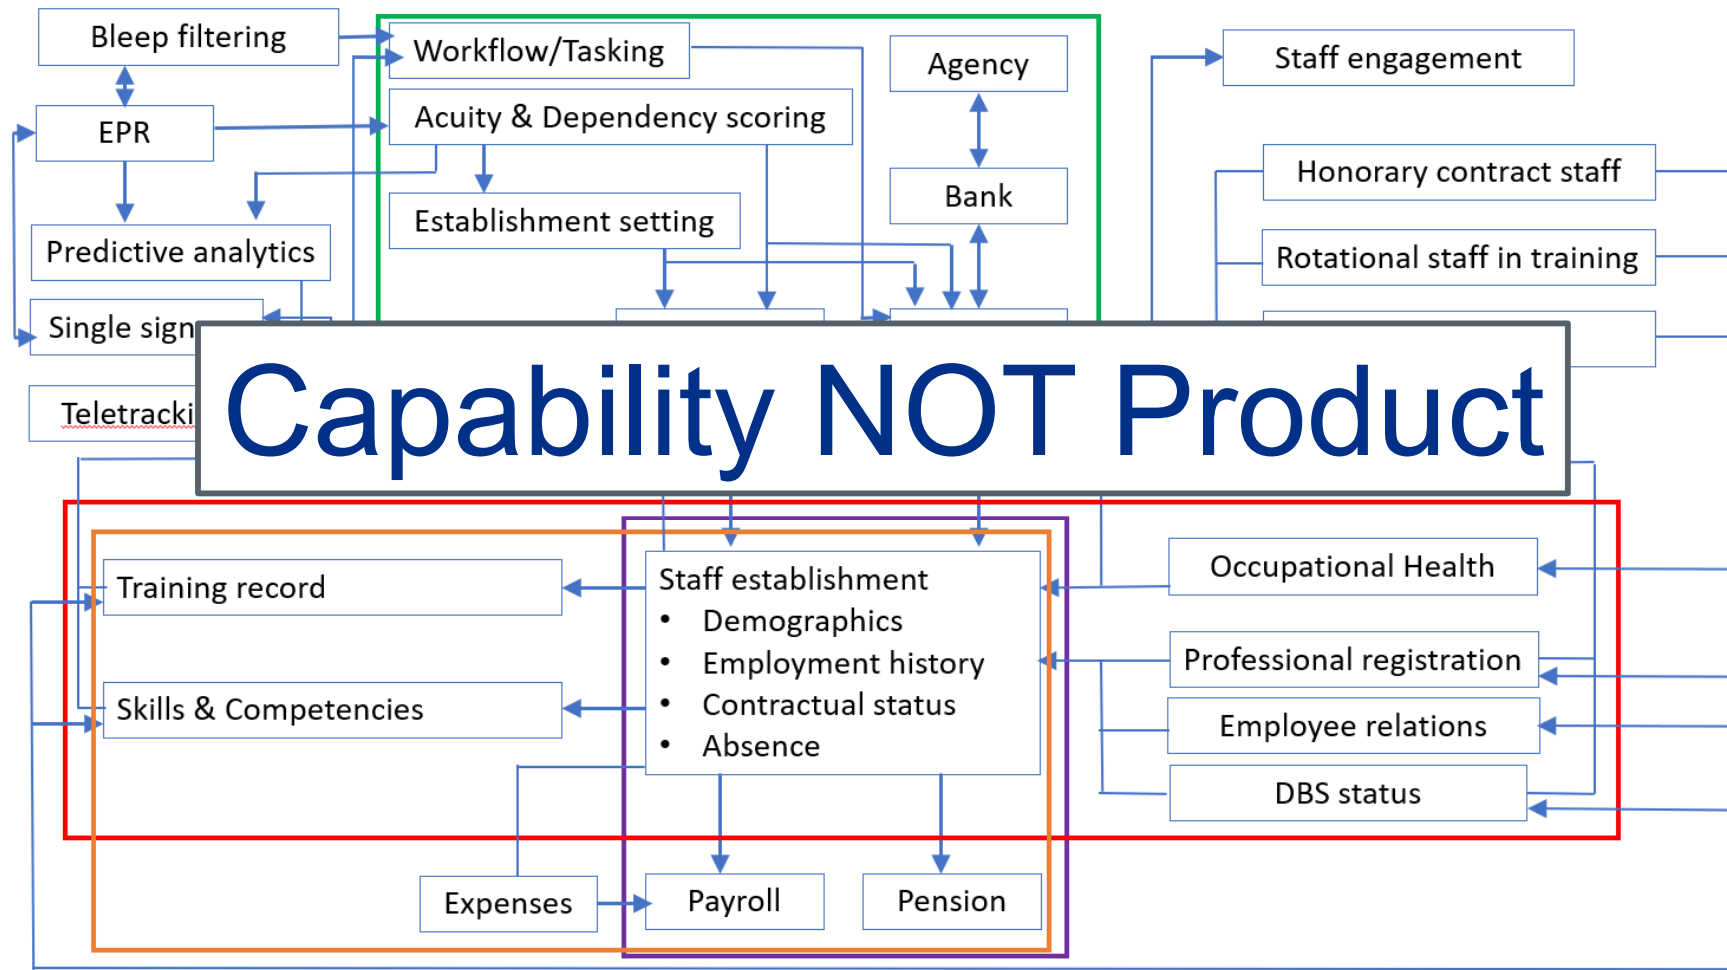

**ESM User Need:** To enable a staff member to move, they need their **full** record of employment, core skills training and immunisations and vaccinations to move with them.

**Aim:** that all Workforce Systems all use the same Data Standards, are interoperable with each other, are inter-modular and that data is accurate, kept up to date and transferable.

## Challenges:

- ESR has 1,500+ interfaces but does not yet have full API capability
- There are some 30+ Training systems that cover the c.50% of the NHS that ESR's OLM does not cover
- 2 largest OH systems account for c.70% of NHS and have been slow to interface
- Rostering systems are dominated by one supplier
- New workforce systems are appearing rapidly, e.g. new rostering systems, collaborative banks, new digital identity and digital passport providers

# Capability NOT Product

  Digital identity  
   Core workforce system  
   Workforce deployment system

Take a look at this picture of 5th Avenue in New York in 1900. Can you spot the car?

Now look at this picture from 1913. Yes, this time where's the horse?

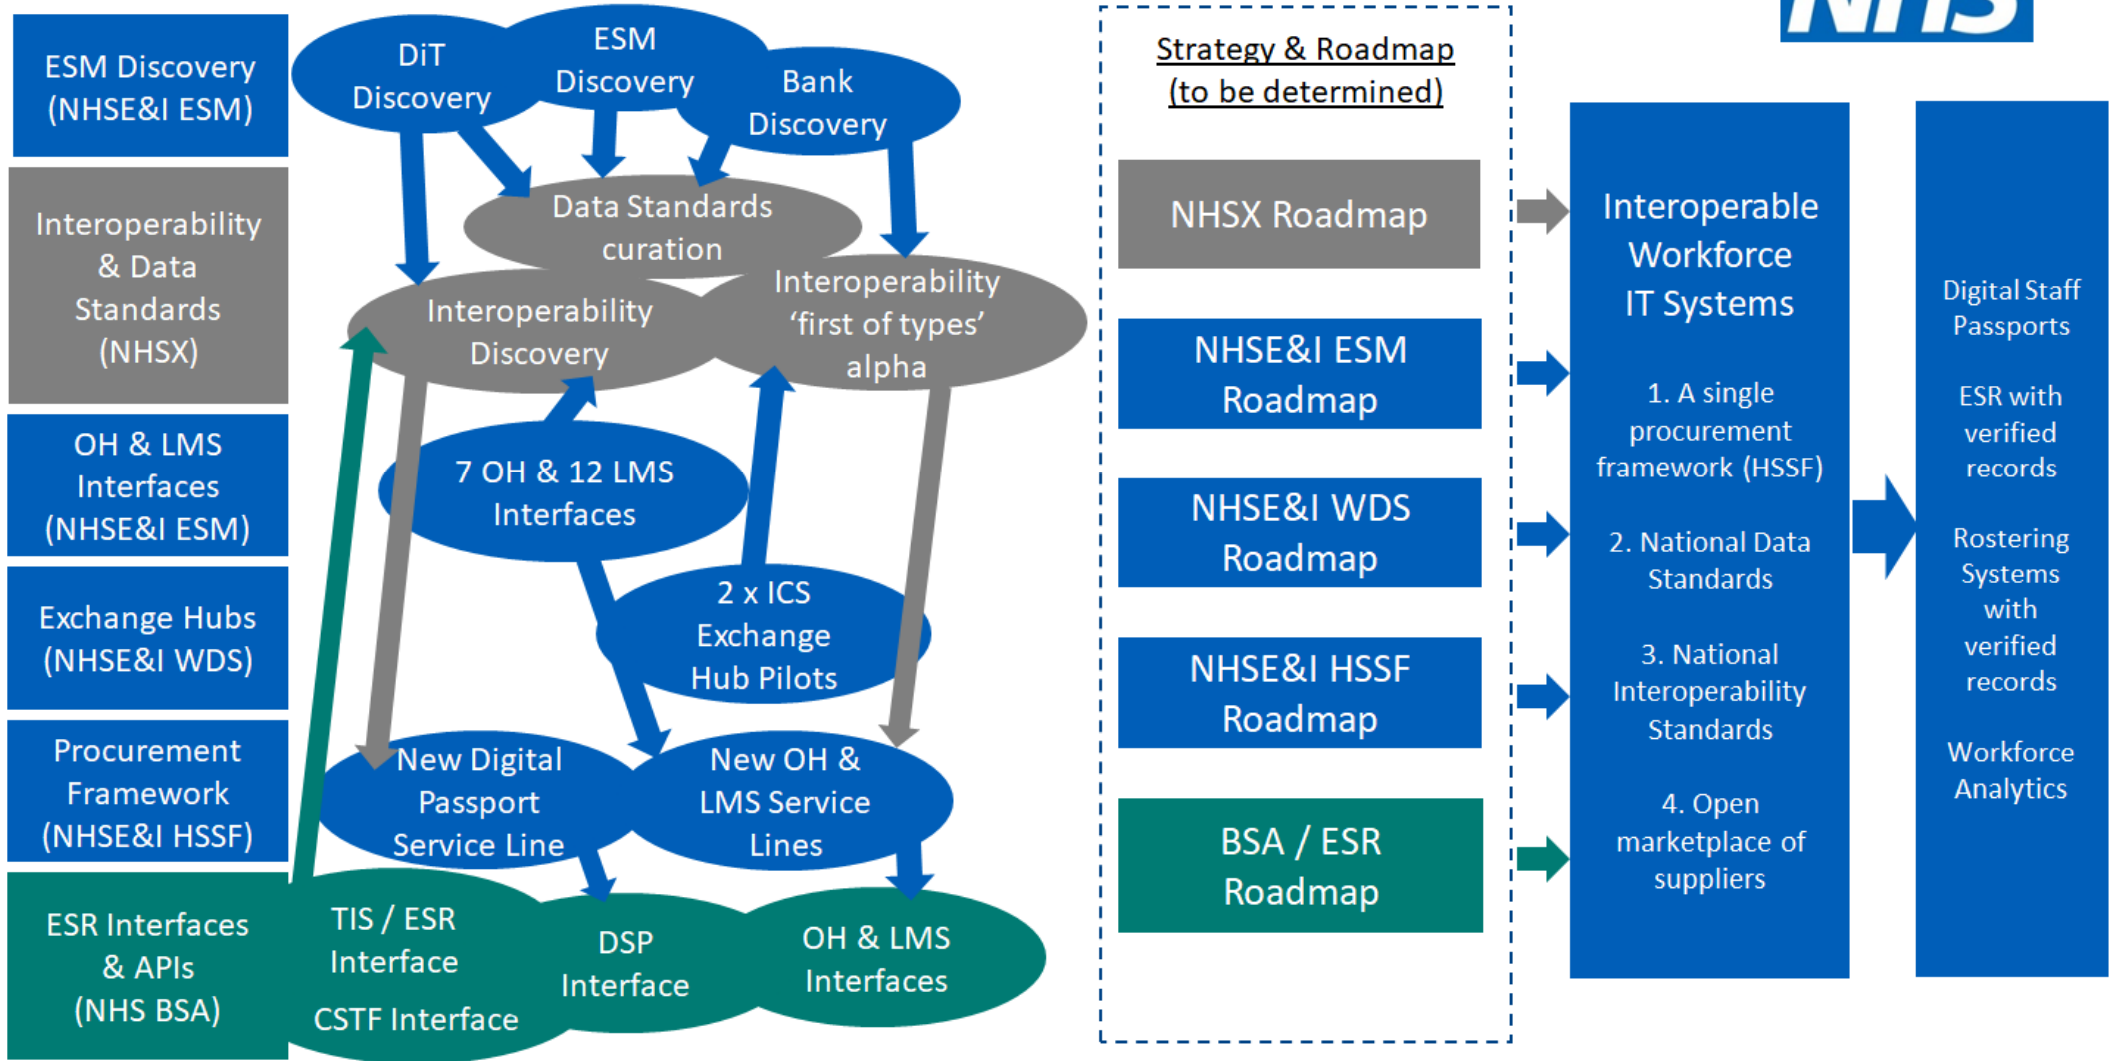

Philip Graham @PhilipGraham  
Saw this today and thought it was a bit faster than the old days.

The first time a **railway** used a true steam locomotive running on rails **was** the Liverpool to Manchester **railway** in 1830. ... Indeed, the **owner** of the **canal** had opposed the **railway** to protect his **investment**. 28 Jan 2018

# Roadmap for Interoperable Workforce IT Systems

# People Digital Strategy

# Developing the Integrated Workforce Digital Strategy for the NHS to enable delivery of the People Plan and People Services

The strategy will be co-created and owned by HEE, NHSx and NHSE/I and is work in progress

# Why do we need a strategy? What are the challenges in the NHS?

Current systems are not used to their best potential, and there are fundamental building block gaps that undermine efforts to digitise and therefore realise the full benefits.

Current systems are viewed as clunky, providing a negative or neutral user experience, and the different wraparound processes/systems created in each organisation can be further barriers to effective system use.

Systems often don't talk to each other, so the NHS at every level is unable to access the quality and scope of data needed to inform effective decision-making to improve workforce planning, retention, engagement, inclusion.

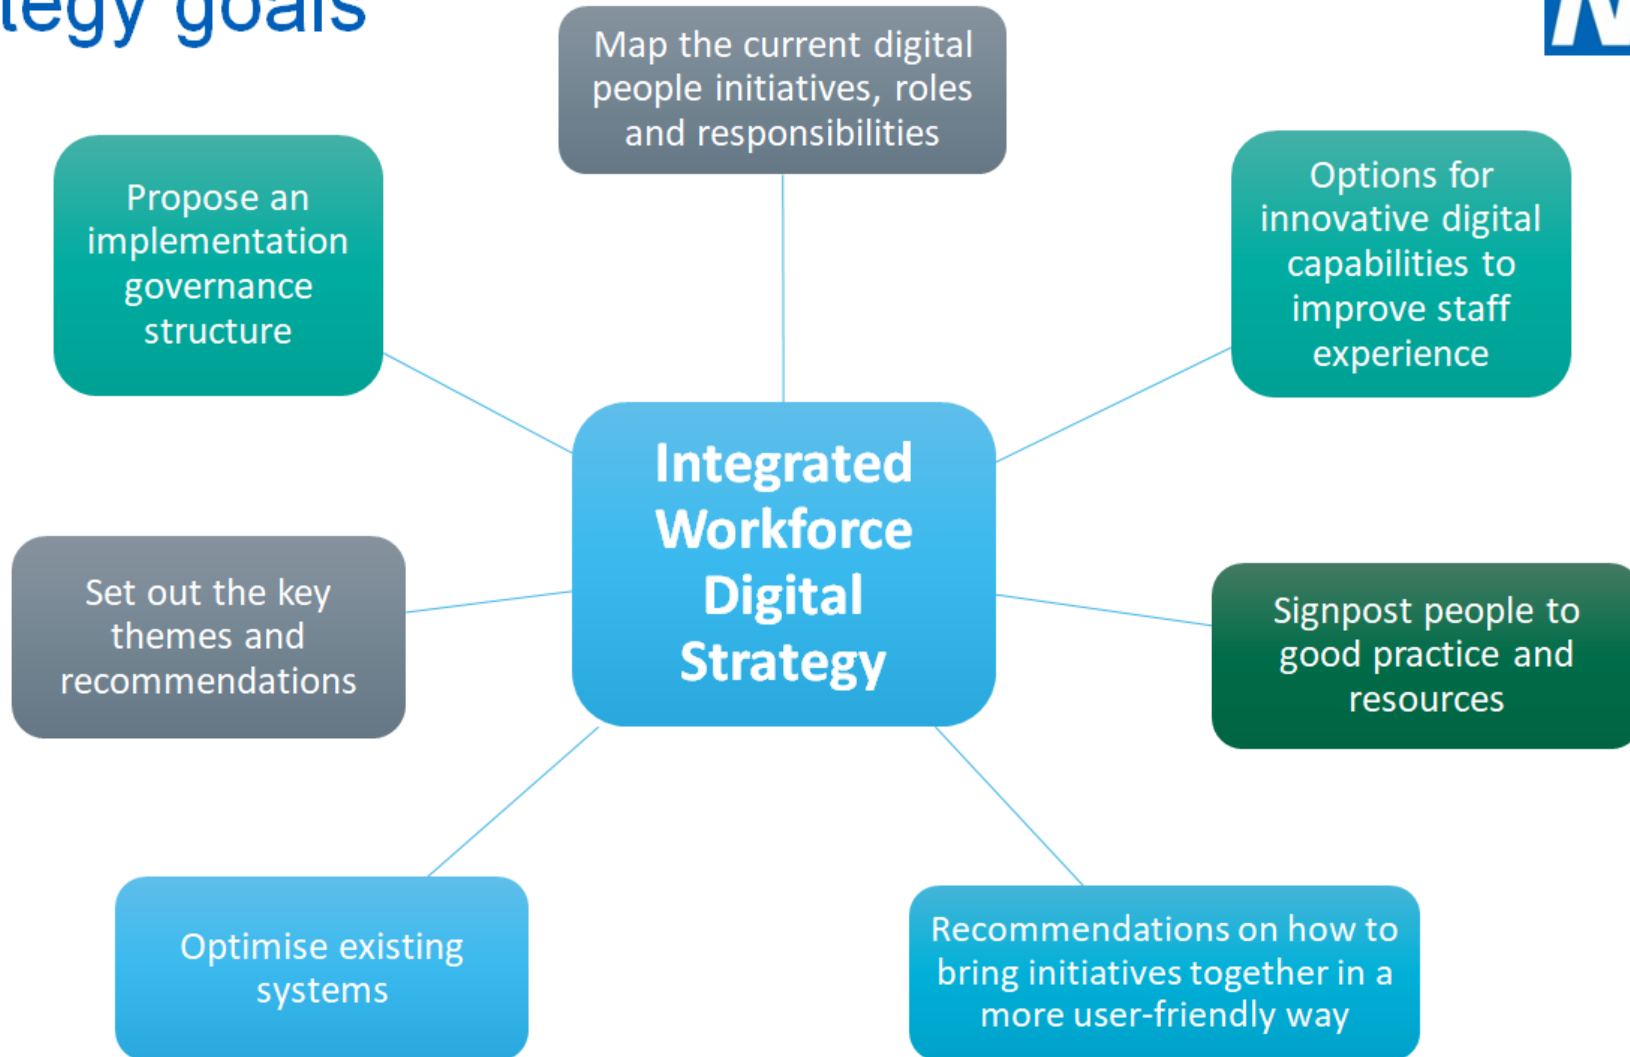

Lack of digital capability within HR&OD within the NHS to manage workforce digital transformation and continuous improvement. This becomes more critical as ways of working continue to evolve more rapidly.

People have been asked repeatedly about their pain points and user needs over the years, but despite this, report having seen no notable improvements.

Lack of collaboration, tools and support at every level of the system to enable the successful management of the end-to-end digital process and missed opportunities as part of this for increased cost-efficiency and speed of delivery.
